

Fragments

**It's not my goal to teach you how to use Fragments
or convince you to use them**

**My goal is to show you how to implement MVC if
you're already using Fragments**

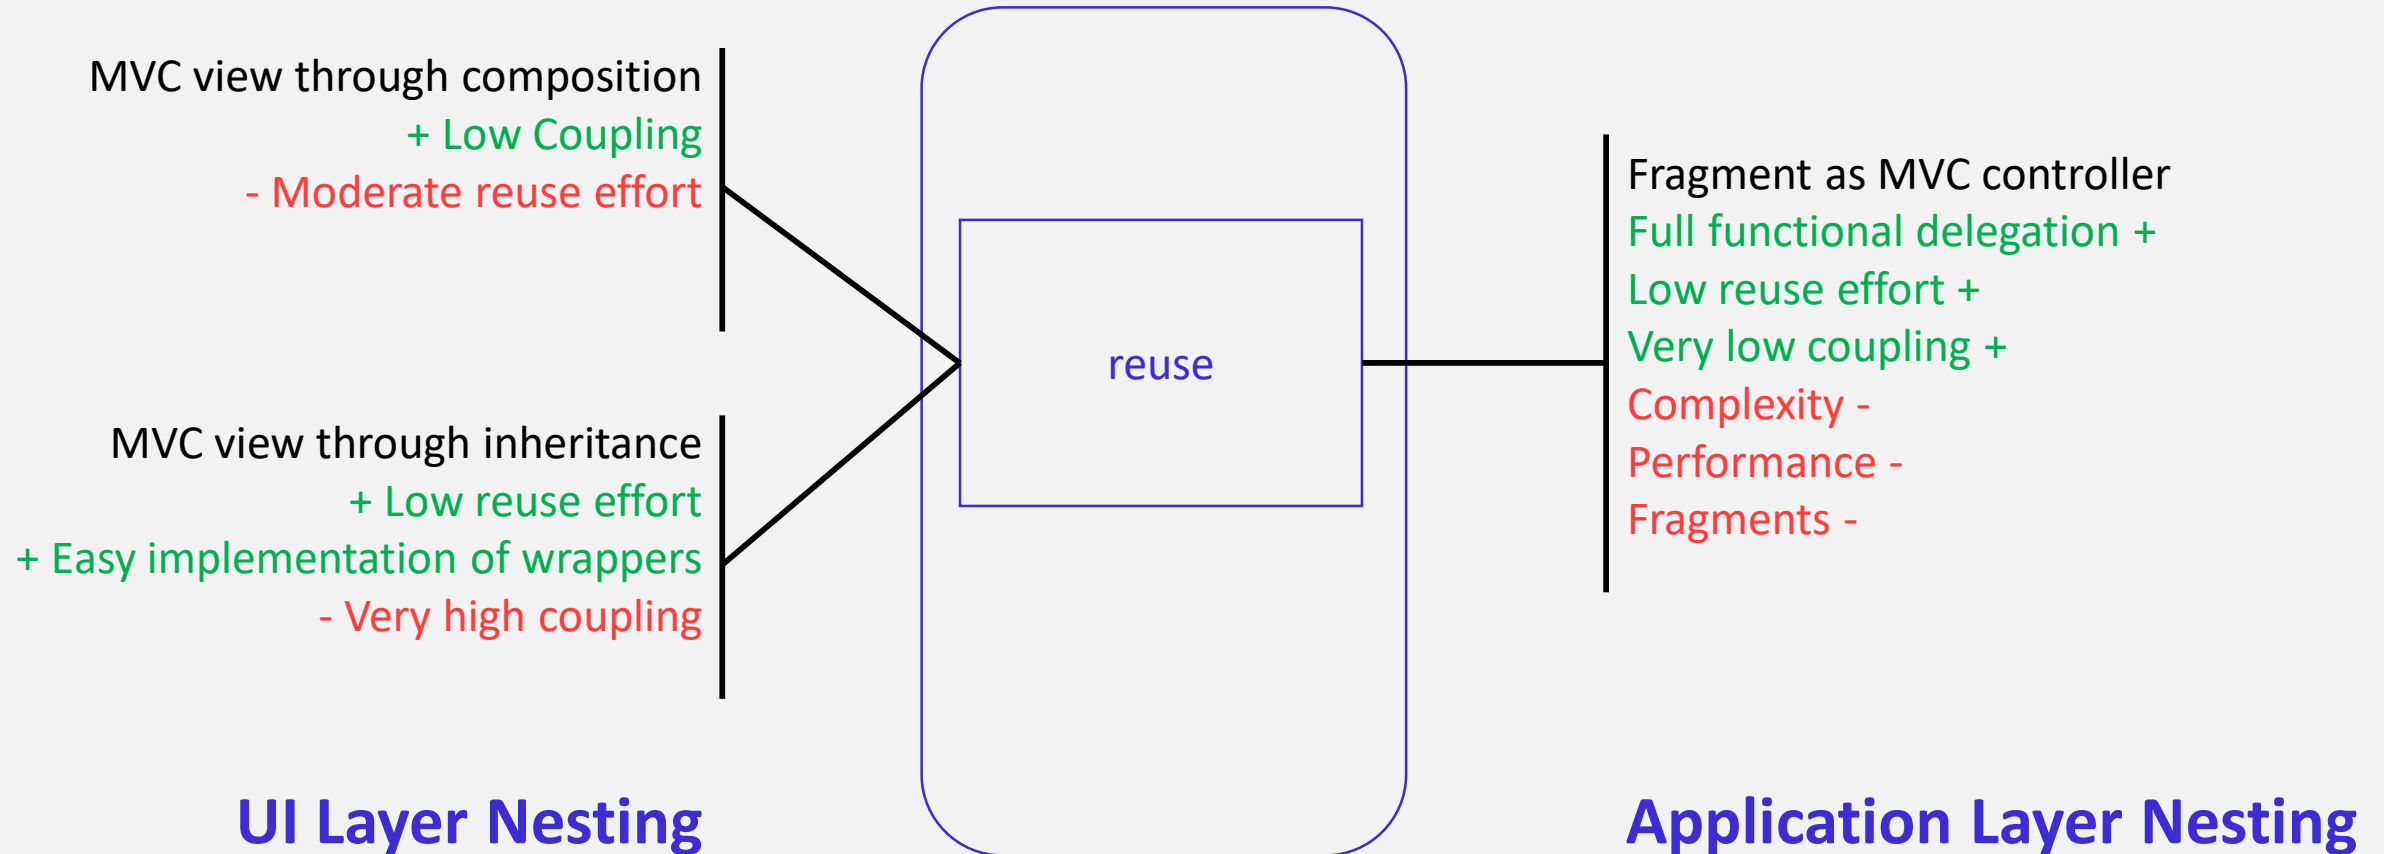

Fragments Summary

Fragments in MVC

Fragments are controllers

Unlike Activities, Fragments are nested controllers

MVC Nesting Options

There are exceptions like ViewPager

Reasons to Choose Nested Controllers Over Views

Independent, unrelated functionality

Organizational structure

Break down big controllers

More...

Nesting of standalone unit-testable controllers?

**Possible, but backstack and state management
are on you!**
